

Test Plan for app.vwo.com

1. Objective

This document outlines the test plan for app.vwo.com, a platform designed to support A/B testing for optimizing website conversions. The objective is to validate that all features and functionalities perform as expected across supported environments for end users and marketing teams.

2. Scope

- Features to be tested: Login Page, Dashboard Page, Create Account Page, AB Testing Campaign Setup and Reporting.
- Types of testing: Manual Testing, Automation Testing, Performance Testing, Accessibility Testing, Security Testing.
- Environments: Multi-browser, multi-device, and cross-platform compatibility.
- Evaluation Criteria: Number of critical and major defects identified, time to test completion, pass/fail rate of test cases, and usability scores from user feedback.
- Team Roles: Test Lead, Testers, Developers, Automation Engineers, Product Owner/Stakeholders

3. Inclusions

- Complete end-to-end workflows for user onboarding and campaign creation.
- Integration checks for analytics, CRM systems, and other third-party services.
- User interface testing on varied screen sizes and resolutions.
- Cross-browser functionality validation.

4. Exclusions

- Load testing beyond 10,000 concurrent users.
- Infrastructure and backend database performance.
- In-depth testing of third-party tools unless directly affecting functionality.

Test Plan for app.vwo.com

5. Test Environments

- OS: Windows 10/11, macOS Ventura/Monterey, Ubuntu 22.04
- Browsers: Chrome, Firefox, Edge, Safari
- Devices: Desktop, Laptops, Android Phones, iPhones, iPads
- Connectivity: Wi-Fi, 4G, 5G
- Requirements: Minimum 4GB RAM, Chrome v120+
- Security Protocols: HTTPS, JWT/Session validation
- Roles & Permissions: QA, Developers, Stakeholders

6. Defect Reporting Procedure

- Criteria: Functional deviation, UI/UX inconsistency, performance lag, accessibility violations
- Steps: Reproducible Steps, Expected vs Actual Result, Screenshots or video, Environment details
- Triage: Severity (Blocker, Critical, Major, Minor), Priority (High, Medium, Low)
- Tools: JIRA, Confluence
- Metrics: Defect Density, Avg. Time to Resolve, Retest Success Rate

7. Test Strategy

Test Design Techniques:

- Equivalence Partitioning
- Boundary Value Analysis
- State Transition
- Use Case Testing
- Exploratory Testing
- Risk-Based Testing

Test Plan for app.vwo.com

Testing Phases:

- Smoke, Functional, Regression, UI/UX, Performance, Accessibility, Security

Best Practices:

- Shift Left Testing
- Parallel Execution
- Continuous Feedback
- Test Data Management

8. Test Schedule

Task	Start Date	End Date	Owner
Test Plan Finalization	May 1	May 3	Test Lead
Test Case Design	May 4	May 7	QA Team
Test Execution Cycle 1	May 8	May 13	QA Team
Regression Cycle	May 14	May 16	QA Team
UAT Support & Bug Retest	May 17	May 20	QA + Dev Team
Test Closure Activities	May 21	May 22	Test Lead

9. Test Deliverables

- Test Plan Document
- Test Cases and Checklists
- RTM
- Daily/Weekly Reports
- Final Summary
- Defect Reports

Test Plan for app.vwo.com

- Lessons Learned

10. Entry and Exit Criteria

Entry Criteria:

- Requirements sign-off
- Environment ready
- Test Cases approved
- Access verified

Exit Criteria:

- 95% execution
- No open Blocker or Critical bugs
- Test Summary approved

11. Tools

- JIRA (Defect Management)
- TestRail (Test Case Management)
- Selenium / Cypress (Automation)
- JMeter (Performance)
- Axe, Wave (Accessibility)
- SonarQube (Code Analysis)
- Confluence, Excel, Sheets

12. Risks and Mitigations

Risk	Mitigation Plan
------	-----------------

Test Plan for app.vwo.com

Key resource unavailable	Backup resource assignment
Test Environment delay	Use mock services, align with DevOps
Feature changes mid-cycle	Change Request process, impact analysis
Limited device availability	Use BrowserStack or LambdaTest

13. Approvals

Name	Role	Date Approved	Signature
Sai Teja Bairi	QA Lead	May 3, 2025	
Product Owner	Product Manager		
Client Reviewer	Stakeholder
